DATE OF IN

SUPPLEMENT TO
REPORT NO.

DIA LIBRARY

25X1X6

1. Koch & Sterzel is experimenting with a new radio tube which has no anode. These experiments are made in collaboration with the Funkwerk plant in Erfurt.
2. Unlike the radio tubes known at present, the tube under study at Koch & Sterzel does not have any anode. A layer of graphite on the inner wall of the glass of the tube takes the place of an anode.
3. The new Koch & Sterzel tube is said to have the same capacity as metallic tubes made in the United States, although its dimensions are slightly smaller than American tubes.] (all end)
